-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 6-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Pat. 6,693,795. Although the conflicting claims are not identical, they are not patentably distinct from

each other because it has been held that omission of an element and its function (wherein said first side portion is disposed at a front end or at a position near the front end of said apparatus body, said second side portion is disposed on the rear side of said first side portion, and said first side portion protrudes outward with respect to said second side portion) in a combination where the remaining elements perform the same functions as before involves only routine skill in the art.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-9, 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al (US Pat. 6,122,167).

Regarding claims 6-9, 11 Smith et al disclose a notebook type information processing apparatus comprising: an apparatus body 26 having a circuit board 51; and a display device 28, 40 connected to the apparatus body 26 by a hinge 30; the apparatus body 26 having, in its side, a first side portion 32a having a height and a second side portion 32b having a height different from the height of the first side portion wherein the first side portion 32a is disposed at a front end or at a position near the front end of the apparatus body 26, the second side portion 32b is disposed on the rear side of the first side

portion 32a, and the first side portion 32a protrudes outward with respect to the second side portion 32b wherein a width of the apparatus body 26 between opposite sides thereof at the first side portion 32a is nearly equal to a width of the display device 28, 40 between opposite sides thereof, and a width of the apparatus body 26 between opposite sides thereof at the second side portion 32b is less than the width of the display device 28, 40 wherein the second side portion 32b is adapted to a circuit board unit having the circuit board 51 wherein a portion of the apparatus body including at least one of the first side portion 32a and the second side portion 32b is made as a detachably attachable component.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Howell et al (US Pat. 6,128,192) teach integrated rear cover for a notebook computer base.

Lee (US Pat. 6,104,605) teaches cover structure for a notebook computer.
